To: Whom It May Concern

Re: Linda D. Sekiya

Dear Sirs,

Mrs. Sekiya has asked me to comment on her health, since it has been noted that she has had several episodes of illness within a relatively short time span. I have seen her for upper respiratory illness, gastrointestinal problems and tension headache. I would also note that she has been under the care of appropriate specialists for ear and eye problems.

In general, she is in satisfactory health. I do not anticipate any deterioration in her health or prolonged disability. She continues to be able to work without restriction. I do not have any recommendations for treatment at this time.

Please call me if there are any questions.

Sincerely,

Michael Inada, M.D.

Dr. Inada,

I would like to request copies of my records on the dates I was seen by you between the periods of December 1, 2000 through September 30, 2001. This is proof, which I need to justify my sick leave during that time.

If there are any questions, please feel free to phone/fax me at 945-7864. Your cooperation on this matter would be sincerely appreciated.

24 July 2001

Dr. Inada,

My employer has requested that I obtain something in writing from the doctor regarding sick leave that I have taken. I had the flu/flu-like symptoms four times in the last eight months. If I remember correctly it was in December, February, March and April. (I was seen by Dr. Kobayashi in March since you were on vacation). My father was diagnosed with cancer in November and being the only one doing everything for him and putting him into hospice, etc., my immune system was down and I was extremely exhausted. I was so stressed and was getting tension headaches quite often. (I have a history of migraine and tension headaches from ten years old). Over the years I have taken sick leave primarily due to headaches. They are requesting verification of my condition and would like to know if there is any cure.

Could you please address this issue and mail it to me. Your cooperation on this matter would be sincerely appreciated.

  
LINDA SEKIYA

Aiea, HI 96701

RE: MRS. LINDA SEKIYA

Dear Frank:

This is an ophthalmic update on your patient, **Mrs. Linda Sekiya**, the pleasant 54-year-old woman who returned for a full eye exam recently. Her medical history is pertinent for asthma, anxiety, "tension headaches", and allergies to Penicillin, Combid, and Codeine. There is a family history of diabetes, hypertension, heart disease, and gastric cancer. Present medications include Xanax, Ambien, Excedrin Migraine, Prevacid, Ecotrin, and Celebrex.

Pertinent findings on exam dated 12/8/00 include:

1. Visual acuity with correction 20/20 OU both in the distance and at near.
2. Pupils, motility, and visual fields were all normal.
3. Slit lamp exam showed 1+ nuclear sclerotic cataracts with 1+ cortical spokes OU, and intraocular pressures were 15 mm Hg OU at 2:30 PM.
4. Dilated fundus exam was normal, with a 0.1 cup OU, and normal maculas and vessels OU. She had a small area of lattice degeneration inferotemporally in the right eye, but the peripheral retinal exams were otherwise normal.

It is my impression that Mrs. Sekiya is doing well with her **early cataracts OU**. I have given her a prescription for new glasses, and asked her to return in one year for a dilated exam. Thank you very much again for allowing me to participate in your patient's management. Please don't hesitate to contact me with any questions or suggestions regarding her care.

Sincerely,

Carlos A. Omphroy, M.D.

RE: Sekiya, Linda D.

Dear Dr. Inada,

Thank you for allowing me to evaluate Linda D. Sekiya. As you recall, she has history of a rash present for 2 months primarily on the forehead. The patient claims that her forehead is itchy and flaky. The patient claims that she has a rash on the neck that started 3 weeks ago which is dry and itchy. She also has itchy bumps on the neck.

**PHYSICAL EXAM:**

**GENERAL:** Well developed, well nourished female in no acute distress.

**HEENT:** No conjunctivitis.

**LYMPH:** Not evaluated.

**SKIN:** Erythematous hyperpigmented plaques on the left neck and right forehead. The neck had multiple brown papules.

**IMPRESSION:**

1. Psoriasis Vulgaris.
2. Fibrous Papilloma.

**RECOMMENDATIONS:**

1. The above diagnosis was thoroughly explained to the patient.
2. Elocon 0.1% cream qday.
3. Cetaphil gentle cleansing bar was recommended.
4. Psoriasis brochure was given.
5. The patient may return for removal of the lesions on the neck.

Once again, thank you for allowing me to assist in this patient's care.

Sincerely,

Timothy H. Hagino, M.D.  
TH/fcc
